Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn are to a digital multimedia broadcasting system for transmitting program tables wherein the types of programs include video, audio, and text data, classified in class 370, subclass 432.
- II. Claims 14-19 and 35-42, are drawn to a digital multimedia receiver and controller for receiving and displaying wide area or local area broadcasting, classified in class 725, subclass 135.
- III. Claims 20-33 and 43-48, are drawn to a control unit for determining whether the receiver is in local area mode, classified in class 725, subclass 59.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for

Art Unit: 2616

patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the invention of group I is directed to a transmitter for transmitting program tables in a digital multimedia system whereas the inventions of groups II and III is directed to a receiver having a display unit and a control unit for controlling the display unit; the invention of group III is further directed to storing identification code and using identification code to control the display. The subcombination has separate utility such as the transmitter of invention I can transmit program tables to multiple receivers in multiple destinations to identify the intended recipient whereas the receiver of inventions II and III can be use to receive and display any data further the invention of group III has utility by itself because it can be used to display wide area and local area broadcasts.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be

Art Unit: 2616

examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shick C. Hom whose telephone number is 571-272-3173. The examiner can normally be reached on Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Pham Chi can be reached on 571-272-3179. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
